December 28, 2009

Mr. Ken Broz
Sapp Brothers Petroleum
9915 South 148th Street
Omaha, NE 68138

Dear Ken:

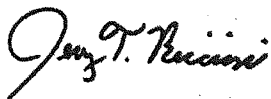

Typically this time of year, the Chinese polyester business begins to slow as their lunar new year approaches. The worldwide recession and recovery efforts have changed some of these dynamics. Because of stimulus money the Chinese government is putting into their economy, the polyester industry in Asia is running hard, creating a strong demand for glycol. On the raw material side, ethylene prices (the building block for glycol) have increased significantly due to ethylene plant outages or delays. Because of these two factors, ethylene glycol prices are on the rise with increases already announced for December and January.

As a result of these increased glycol costs, Old World Industries is announcing a price increase of \$0.50 per gallon (\$0.30 per gallon for 50/50 prediluted coolant) on all orders shipped on or after January 11, 2010 on all brands of ethylene glycol based antifreeze and coolant. At this time we do not anticipate product availability issues, but Old World reserves the right to limit orders based on product availability. We will continue to require a lead time of ten (10) business days from the order date to the required delivery date or customer pickup date for all orders.

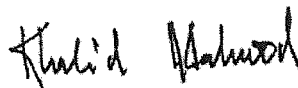

If you have any questions or need further information about current market conditions, please do not hesitate to call your Old World salesperson. We appreciate your continued support and understanding.

Sincerely yours,

OLD WORLD INDUSTRIES, INC.
